DETAILED ACTION

Notice of Amendment

1. In response to the amendment filed on 05/15/2006, amendments to the specification, amended claims 1 and 5-11, and canceled claims 12-16 are acknowledged. The current rejections of the claims are *withdrawn*. The following new and reiterated grounds of rejection are set forth:

Drawings

2. The drawings were received on 05/15/2006. The examiner accepts these drawings.
3. The drawings are objected to under 37 CFR 1.83(a). The drawings *must* show every feature of the invention specified in the claims. Therefore, the cosmetic composition of claims of claims 5-11 and the container of claim 9 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 3, 8, and 10 are objected to because of the following informalities: the positive recitation of claim language adds no structural limitations that further define the claimed apparatus, but conversely positively recite functional language. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3 and 8-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The examiner notes a single claim which claims both an apparatus and the method steps of using the apparatus is indefinite under 35 U.S.C. 112, second paragraph. In *Ex parte Lyell*, 17 USPQ2d 1548 (Bd. Pat.

Art Unit: 3736

App. & Inter. 1990), a claim directed to an automatic transmission workstand and the method steps of using it was held to be ambiguous and properly rejected under 35 U.S.C. 112, second paragraph.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 3 and 8-10 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to neither a “process” nor a “machine,” but rather embraces or overlaps two different statutory classes of invention set forth in 35 U.S.C. 101 which is drafted so as to set forth the statutory classes of invention in the alternative only. *Id.* at 1551. See MPEP 2173.05(p).

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

9. Claims 1-11 are rejected under 35 U.S.C. 102(a) as being anticipated by Non-Patent Literature submission: Abstracts of a presentation at a skin conference in Hamburg, 2003, (hereinafter, Abstract) specifically Flament et al “Finger perception

Art Unit: 3736

metrology. Correlation between friction force and acoustic emission”) and Fleming (“Mobile, multimedia computing for improved clinicopathologic correlation in dermatopathology”).

10. For claims 1, 3-6, and 8-11, Abstract discloses a prototype tactile acoustic analysis apparatus (Flament et al, pages 168-169), comprising: means for acoustic signal- generating, collecting, storing, displaying, and correlating of frictional forces operably generated via animal skin rubbing animal skin that is capable of use as a clinical evaluation tool of skin attributes. Said apparatus further comprises: (a) allowing clinicians (e.g. a beautician or professional advisor) to study the impact the effect of the application cosmetic compositions that affect skin attributes, including: hydration, texture, roughness, porosity, wrinkles, and pathologies of cutaneous tissue (psoriasis, eczema, dry skin, etc...) and (b) a medium for indicia of at least said two said skin attributes (i.e. test results) that allows said clinician to distinguish the effect of said application of cosmetic composition. The apparatus as disclosed by Abstract is capable of being placed alongside a container holding said cosmetic composition and facilitating cosmetic composition selection based on the determined skin attributes.

11. For claims 2 and 7, Abstract discloses a means for digitally displaying test result signals via the internet and/or handheld software (Fleming, pages 170-171)

Response to Arguments

12. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
